- Ansible and Ansible Tower by Red Hat

Available ISV Learning Paths:

- ISV OpenShift Learning Path
- ISV Cloud-Native App Development Learning Path
- ISV Agile Integration Learning Path

Find your path. Start your journey.

Red Hat Partner Enablement Learning Paths for ISVs (Independent Software Vendors)

Independent Software Vendors have been critical to Red Hat’s success. As your software products and applications move to a Cloud-ready world, Red Hat is standing alongside you with the tools, technologies and support to guarantee your success in this new world.

To ensure you have the skills to migrate, build, maintain and support software in a cloud environment, we’ve put together a series of Learning Paths across different technology areas, specific to the needs of our ISV’s. Our learning paths are flexible journeys, combining e-learning and in-person courses, allowing you to jump in at the right level for you and advance to expect level if that’s what is required. We hope you enjoy the learning journey.
